

Martí Fernández Garrigós

Business + Technology hybrid profile · Data analysis and process automation

[Email] · [Phone] · [City, region]

[linkedin.com/in/marti-fernandez-garrigos](#) · [GitHub / portfolio]

PROFESSIONAL SUMMARY

Accounting and Finance graduate and Computer Engineering student, with experience in purchasing, administration and finance within an industrial environment. I combine real business understanding with the technical ability to analyse processes, identify improvements and build solutions that increase efficiency: advanced Excel, VBA automation and AI applied to business, with hands-on involvement in an ERP implementation. Analytical and self-taught, aiming to evolve towards data and business analysis.

PROFESSIONAL EXPERIENCE

Purchasing Technician · [Company name] [mm/yyyy] – Present

- End-to-end management of the procurement cycle for machined components, from issuing purchase orders to tracking lead times, ensuring the availability of materials critical to production.
- Control and analysis of purchasing stock, adjusting inventory levels and reorder points to minimise stockouts and excess inventory.
- Supplier price studies and comparisons to support procurement and negotiation decisions.
- Analysis of consumption and supplier workload to anticipate material needs and balance supply capacity.
- Active participation in the implementation of a new ERP, providing functional support across purchasing and accounting/administration during configuration and go-live.
- Development of internal automation tools with VBA and AI, reducing repetitive manual tasks and improving data reliability and traceability.

Accounting Administrator · Farmaciola S.L. [mm/yyyy] – [mm/yyyy]

- Management of the invoicing cycle: issuing and controlling invoices while ensuring accurate records.
- Regular bank reconciliations, matching transactions and detecting discrepancies.
- Posting of bank transactions and recording of operations in the accounting system.
- Customer service and email management, handling administrative and commercial enquiries.

EDUCATION

Computer Engineering (in progress) · [University] [start year] – Present

Bachelor's Degree in Accounting and Finance · [University] [graduation year]

KEY PROJECTS

- StockFlow — Inventory-movements BI from Excel: inflows/outflows, top items, trends, turnover and heatmaps (JavaScript, SheetJS, ECharts).
- Price analysis — Evolution and comparison of purchase prices by material: year-on-year/quarterly variation, heatmaps and volatility alerts (Chart.js).
- Suppliers & orders BI — App-style panel with pending-orders tracking, history and filters by supplier and item (ECharts).
- Invoice price comparator — Reads PDF invoices, extracts prices and compares them against a reference database, flagging overcharges (pdf.js).
- VBA automations — Delivery note vs invoice matching, procurement requirements calculation and production vs invoicing reconciliation.
- Gym application — Personal development project applying programming knowledge.

TECHNICAL SKILLS

Advanced Excel: PivotTables, Power Query, Power Pivot, VBA and advanced formulas (VLOOKUP/XLOOKUP, INDEX/MATCH).

Automation: macros and VBA to automate administrative and purchasing processes.

ERP: ERP implementation; experience with Ten ERP and a custom ERP built in Java.

AI applied to business: language models (prompting) to build tools, analyse processes and automate tasks.

Programming (in training): development fundamentals (JavaScript, Java, HTML) and data visualisation.

SOFT SKILLS

Analytical thinking · Problem solving · Fast, autonomous learning · Continuous improvement · Adaptability · Communication · Cross-functional work between business and technology.
